

EuroCloud to App Liftoff in the ATmosphere

**EuroSky Live, Berlin, November 2025
Boris Mann, AT Community Fund Lead**

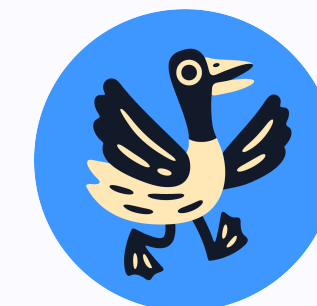

Ich bin ein Berliner!

Building open ecosystems

- From **open source licensing** to an even more powerful concept:
- **protocols** that can provide the foundation for interoperability and coordination while providing the resiliency of multiple code implementations and a multipolar ecosystem

**"Come for the code,
stay for the community"**

ATProto Community Fund

- Formed in order to host ATmosphereConf
- We've supported community events around the world, the ATGeo & IndieSky initiatives, and targeted grants for infrastructure and code experiments
- There are **no butterflies** in this presentation!

Welcome to the
ATmosphere!

~~You~~ We Can Just Do
Things"

EuroCloud + AT Protocol = Apps

- The EU has realized that having compute resources and the rest of a cloud stack is of high importance
- Now, what's the plan for building software on top of your servers?
- Where do the apps come from? And are we just going to drive users into European apps that are at risk of being acquired or shutdown?

iCloud is a fantastic user & dev experience

EuroCloud Accounts!

- We have the building blocks for great experiences with ATProto
- Every account has storage attached
- Everything you post to Bluesky and every other ATProto powered app is stored in your user account
- You can host accounts across the EU for true data sovereignty

Events!

- Smoke Signal powers events & RSVPs
- Designed a community events Lexicon to be shared & re-used

The screenshot shows the Smoke Signal website interface. At the top, there's a navigation bar with links for 'Smoke Signal', 'About', 'Search', 'Help', and 'Blog'. On the right, there are buttons for 'Add Event', a user profile '@bmann.ca', and 'Log out'. The main heading is 'Eurosky Live: Berlin 2025', with a 'Share' button to its right. Below the heading, it says 'Organized by @eurosky.social'. A yellow banner indicates 'Starting in 10 hours'. The 'Event Details' section on the left shows the start time 'November 19, 2025 01:30 AM PST' and end time '09:30 AM PST', with a 'Download .ics' link. The right section shows 'You're attending' with a 'Going' dropdown and an 'Update RSVP' button. The 'About this event' section describes the event as a gathering of policymakers, media leaders, investors, and founders to explore open infrastructure and European innovation.

About this event

Eurosky Live will bring together policymakers, media leaders, investors, and founders to explore how open infrastructure can enable European innovation. You'll see live demos, meet the startups building on Eurosky, and hear from experts on the policy, business, and technical opportunities ahead.

App Liftoff 🚀

- Portable identity where data is owned by the user
- Apps co-operate and compete
- Commons infrastructure to commodify costs
- The idealism of open source & protocols, the pragmatism of accessing a growing market without having to build everything from scratch
